The City Water Today

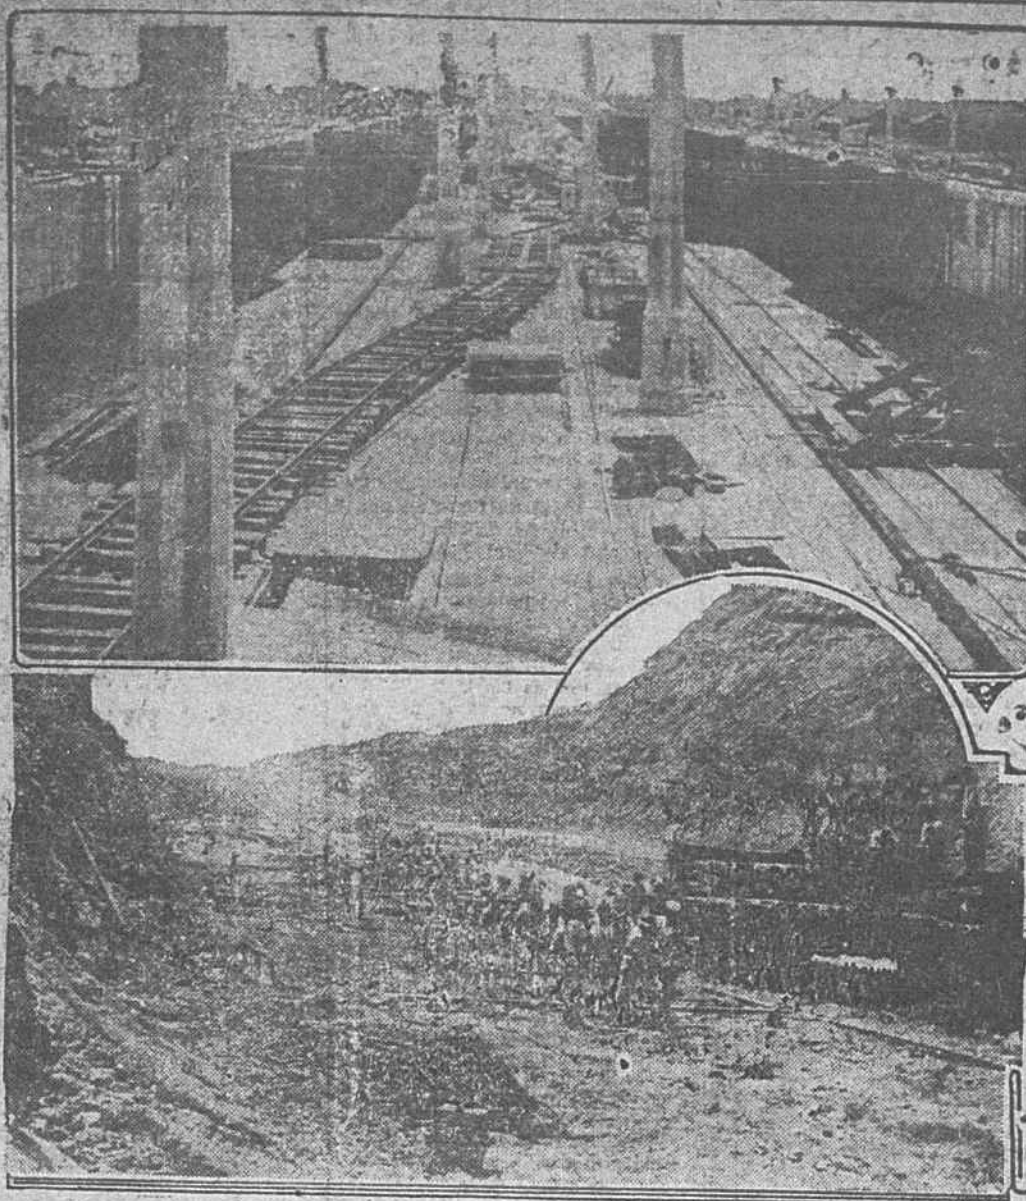

Subjoined is today's official report of the condition of the city water, in connection with which the city water works and sewerage board authorize the following statement:

One of the most surprising results where a pure water supply has been introduced is the disclosure of the remarkable relation apparently existing between polluted water and infant mortality. Pure water shows a remarked reduction. In a less marked degree this seems true as regards diarrhoea and gastro-intestinal disorders. As to tuberculosis the evidence, though less striking, is interesting and suggestive. Data seems to show a marked relation in the decline of pneumonia and bronchitis, following the substitution of pure for impure water.

Following is today's test for fever and other germs as made by Perkins Boynton.

ANALYSIS.			
No. bacteria in 1.0 c. c.	Bacillus coli present in		
River water..... 60	0.1 c. c. 1.0 c. c. 10 c. c.	x	x
City water..... 0	0	0	0
EXPLANATION.

PUT FINISHING TOUCHES TO GATUN LOCKS; CULEBRA CUT ALMOST IN READINESS FOR FLOODING OF CANAL OCTOBER 5

(c) Underwood & Underwood.

The latest photographs from Panama show the canal near completion. One of the accompanying pictures shows the upper Gatun locks; the other the floor of the Culebra cut, which laborers are busy cleaning up in preparation for the flooding of the big waterway on October 5.

The Average Man

[By Stuart F. Reed.]

Man's fate is wrought in the loom of years,
To a pattern traced by an unseen hand;
The shuttle flies and the weaver sighs
For the work is slow and tragic and grand.
Some shuttles are filled with golden thread,
For the few great souls who march in the van;
But most are filled with the thread used for
The warp and woof of the average man.

And not till the loom stands, step'd and still,
And the busy shuttles no longer fly,
Shall God, his hidden design reveal,
And explain to us all the reason why
The average man is needed as much
In the wonderful world He had planned,
As the man in majesty fashioned
By the shuttles filled with the golden strand.

For isn't it so in want and in woe,
When fate has left us no hope and no plan;
Then we welcome the counsel and aid
Of the old fashioned average man.
Wearing the grime of shop or of mine,
He does his life work as well as he can;
Some day God will bless him and crown him
The honest, true-hearted, average man.

WHITE PLAGUE CAR CAUSES CURIOSITY

Different Stages of the Diseases Are Shown by the Various Exhibits.

The tuberculosis exhibits of the West Virginia Anti-Tuberculosis League arrived in the city Monday morning and is on display in the league's white car at the West End passenger station with Dr. Thurman Gillespie, of Wheeling, in charge. Thousands of people poured through the car at the morning and afternoon periods today and all were astonished at the wonderful facts concerning the white plague made known by the league through the exhibit and Gillespie.

The principal exhibits in the car are pictures of victims of tuberculosis at different stages of the disease, the care of tuberculosis patients and the manner of catching the disease. A number of lungs of tuberculosis patients is arranged in the west end of the car and shows the effects of the disease at its different stages.

Those in charge of the car say that in comparing the white plague with the yellow plague and black plague one is astonished to know how many more people die annually from the white plague. In the United States the annual toll of death caused by the white plague is 160,000 while in 115 years the yellow plague has caused 100,500 deaths. In comparing the number

of deaths caused in the United States by the white plague and in India by the black plague, of 1,000 people the white plague claims twenty-three victims while the black plague only claims nineteen. If a case of scarlet fever or black plague was announced in the city every doctor and health officer would start an investigation at once, and every possible means would be taken to prevent a spread of the disease, but very little care or precaution is taken to prevent the spread of tuberculosis. If one-tenth the precautions were taken with the white plague that is taken with the yellow and black plagues in a short time the number of annual deaths would begin to fall off and in a few years it would be cut in half.

The car will be open this evening from 7 to 9 o'clock. Tuesday the car will be open in the morning from 10 to 11:30 o'clock, in the afternoon from 2 to 5 o'clock, and in the evening from 7 to 9.

The Henry B. Harris estate announces that it will immediately begin organizing a second company to play "The Fight," the piece now running in New York to big business. The rehearsals begin early this week, and the company will appear in the larger cities of the East and Middle West.

SPECIAL TERM

Of the County Court of This County Will Be Held Here Wednesday.

A special term of the county court will be held Wednesday to audit for payment county and district claims and orders arising from the fund of justices' fines. The court will grant certificates to applicants for notary public commissions, qualify notaries public and pass such orders as may be necessary on the application of James H. Mines, administrator of the estate of James B. Sandusky, for a reduction of his bond as such administrator.

OFF FOR SERIES.

Mr. and Mrs. P. J. Lyons have gone to Pittsburg and from that city they will go to Cleveland. It is their intention to take in the major baseball series in the East before returning. Mr. Lyons as a fan for New York will return poorer but wiser.

GO TO CONVENTION.

The Rev. and Mrs. W. M. Long of the Central Christian church went on the 11:30 o'clock interurban car to Fairmont, where they joined a party of Fairmonters and started to Toronto, Can., to attend the national convention of the Christian church. They will be gone ten days. The Rev. F. K. Struve will fill Mr. Long's pulpit during the latter's absence.

MUSCULAR INSUFFICIENCY

For generations, in fact ever since the birth of optics as a science, the leading men of the optical profession have been grappling with this great question.

It means that the eyes do not point to the same object, or are in the same plane. But it is possible that one eye may be made to point with the other, the stronger eye being in control, but some muscle of the weaker eye must be brought under control and made to see with the stronger.

This muscular insufficiency can be overcome by wearing properly fitted lenses. The degree of satisfaction is established by the degree of muscular insufficiency overcome.

Special attention given to cross-eyes and other defects in the vision of children.

DOCTOR OF OPTICS,
Up-to-date Eye Glasses and Spectacles.
FOURTH ST., Greeney Bldg.

PEGGING ALONG

Some stores simply peg along season after season in the same old rut.

Others don't.

We're one of the others.

If there's a new cut to a garment—a new kink to the tailoring—a new fabric—you'll be sure to find it here—if it's worthy. Take our \$25.00 Men's Suits or our \$15.00 Rain Coats for instance.

You'll find that they are handsome and up to the hour in every detail.

Couldn't get newer or better styles in the big city.

We're ever on the alert for new ideas, and we always show them first.
